Edgecore OAP100 is an enterprise-grade, concurrent dual-band 802.11ac wave 2 outdoor access point, designed specifically to withstand harsh weather conditions by IP68 rated, rust-resistant plastic housing in outdoor and industrial environments. The OAP100 features 2x2:2 MU-MIMO radio that can each transmit data to multiple clients simultaneously, and together have a combined data rate of up to 1.3 Gbps. For built-in 2.4GHz and 5GHz antennas, there are two software-selectable options for different services.

OAP100’s integration with Bluetooth Low Energy (BLE) enables new value-added applications such as location tracking, iBeacon, and other location-based services. Besides, with a built-in GPS receiver, IT administrators can easily keep track of the location of all deployed OAP100s, simplifying the maintenance task and adding a new potential of location-related services. Meanwhile, OAP100 also supports Long Term Evolution (LTE) to receive network service, decreasing the deployment difficulties.

The TIP open OAP100 AP hardware is pre-installed with TIP’s Open AP software, saving time and hassle from software installation, but at the same time reserve the flexibility for further changes. From SMB to MDUs to larger venues, the TIP open OAP100 is a flexible hardware platform for the different network use cases and requirements.
